Contents of Volume 108

Number 1, 7 May 1984

BOWMAN, C. L. and BAGLIONI, A., Application of the Goldman–Hodgkin–Katz Current Equation to Membrane Current–Voltage Data 1

PARIKH, J. C. and PRATAP, R., An Evolutionary Model of a Neural Network 31

ROSSINI, G. P., Steroid Receptor Recycling and its Possible Role in the Modulation of Steroid Hormone Action 39

BLANK, M., Molecular Association and the Viscosity of Hemoglobin Solutions 55

ESHEL, I., On the Evolution of an Inner Conflict 65

BRIGGS, W. E., Cooperativity and Extrema of the Hill Slope for Symmetric Protein–Ligand Binding Polynomials 77

BERETTA, E. and GAMBALE, F., A Thermodynamic Interpretation to Formation of Clusters at the Cell Surface 85

MOORE, G. P., MOORE, A. R. and GROSSMAN, L. I., The Frequency of Matching Sequences in DNA 111

BELINTSEV, B. N., The Spatial Form Self-organization in the Development of *Dictyostelium discoideum* 123

SMITH, R. J., Determination of Relative Size: The "Criterion of Subtraction" Problem in Allometry 131

LISANTI, M. P., FLANAGAN, M. and PUSZKIN, S., Clathrin Lattice Reorganization: Theoretical Considerations . . . 143

LETTER TO THE EDITOR

ESHEL, I., Are Intragametic Conflicts Common in Nature? Do They Represent an Important Factor in Evolution? . 159

Number 2, 21 May 1984

NAKAMOTO, T., MCCROSKY, M. and MALLEK, H. M., The Role of Ascorbic Acid Deficiency in Human Gingivitis—A New Hypothesis 163

MIZRAJI, E. and LIN, J., Chemicomechanical Transduction Performed by Enzymes Activated by Polymers 173

FERREIRA, R. and JACCHIERI, S. G., Why Are There Two Kinds of Chain in Tetrameric Hemoglobins? 191

SILK, J. B., Local Resource Competition and the Evolution of Male-biased Sex Ratios 203

MANNING, J. T., Males and the Advantage of Sex 215

CHEN, I. I. H. and DIANA, J. N., Mathematical Modeling of Capillary Density 221

VICTORRI, B. and DEROME, J.-R., Mathematical Model of Visual Perception 227

CLEAVE, J. P., LEVINE, M. R. and FLEMING, P. J., The Control of Ventilation: a Theoretical Analysis of the Response to Transient Disturbances 261

ABUGOV, R., Genetic and Strategic Models for the Evolution of Mating Systems 285

KWOK, L. S., Calculation and Application of the Anterior Surface Area of a Model Human Cornea 295

LETTER TO THE EDITOR

ROSEN, G., Orthogonal Projection Experiments for Many-Parameter Dependent Phenomena: Optimization of Hydroponic Plant Growth 315

Number 3, 7 June 1984

LENSKI, R. E., Coevolution of Bacteria and Phage: Are There Endless Cycles of Bacterial Defenses and Phage Counterdefenses? 319

ELDER, D., Theory of Epigenetic Coding 327

WATERMAN, M. S., Efficient Sequence Alignment Algorithms . . 333

BAK, A. L. and JØRGENSEN, A. L., RNA Polymerase III Control Regions in Retrovirus LTR, Alu-Type Repetitive DNA, and Papovavirus 339

COOK, N. D., The Transmission of Information in Natural Systems 349

COHEN, E. B., New Concepts of Chemical and Biological Structure: Consequences of Consistently Treating Weak Bonds as Chemical Structural Determinants 369

HAEFNER, J. W. and EDSON, J. L., Community Invasion by Complex Life Cycles 377

RATNER, V. A. and RODIN, S. N., Coevolution of Directly Contacting Proteins in Phage-Bacterium Ecosystem: Possibility or Fiction? 405

SHINOZUKA, M., TSURUI, A., NAGANUMA, T., MOSS, M. and MOSS-SALENTIJN, L., A Stochastic-Mechanical Model of Longitudinal Long Bone Growth 413

GÜNTHER, B. and MORGADO, E., Transport Similarity: Dimensional Analysis of Diffusion at Cellular Level 437

CORNISH-BOWDEN, A., Enzyme Specificity: Its Meaning in the General Case 451

TRAINOR, L. E. H., ROWE, G. W. and SZABO, V. L., A Tetrahedral Representation of Poly-Codon Sequences and a Possible Origin of Codon Degeneracy 459

LETTERS TO THE EDITOR

ISHIDE, K., Gain of Information and Evolutionarily Stable Strategy in Hypercyclic Organization 469

GLEESON, S. K., Medawar's Theory of Senescence . . . 475

Number 4, 21 June 1984

ROBERTS, D. W., A Chemical Contact Pressure Model for Phyllotaxis 481

REED, J. and STENSETH, C., On Evolutionarily Stable Strategies . 491

MIERTUS, S. and TREBATICKA, M., Theoretical Study on the Alkylation and Protonation of the Nucleic Acid Bases 509

FLORES, R., Is the Conformation of Viroids Involved in their Pathogenicity? 519

OKAMATO, M. and HAYASHI, K., Frequency Conversion Mechanism in Enzymatic Feedback Systems 529

PARTRIDGE, D., LOPEZ, P. D. and JOHNSTON, V. S., Computer Programs as Theories in Biology 539

ZHADIN, M. N., Rhythmic Processes in the Cerebral Cortex . 565

MOSTELLER, R. D. and GOLDSTEIN, B. E., A Mathematical Model that Applies to Protein Degradation and Post-Translational Processing of Proteins and to Analogous Processes for other Molecules in Non-growing and Exponentially Growing Cells . 597

GETZ, W. M., Population Dynamics: a *per capita* Resource Approach 623

ZHEN-GANG, L. and QIU-YING, W., A Hypothesis on the Action of Chromosomal Genes 645

STORY, R. and PAINE, T. A., Some Neglected Aspects of Vegetation Classification in Integrated Surveys 663

Index to Volume 108

ABUGOV, R., Genetic and strategic models for the evolution of mating systems, 285
Algorithms, sequence alignment, efficient, 333
Alkylation and protonation of the nucleic acid bases, a theoretical study, 509
Allometry, the "criterion of subtraction" problem in; the determination of relative size, 131
Alu-type repetitive DNA, retrovirus LTR, and papovavirus, RNA polymerase III control regions in, 339
Ascorbic acid deficiency, a new hypothesis of its role in human gingivitis, 163
Association, molecular, and the viscosity of hemoglobin solutions, 55

Bacteria and phage, coevolution of; are there endless cycles of bacterial defenses and phage counterdefenses?, 319
Bacterium-phage ecosystem, coevolution of directly contacting proteins in; possibility or fiction?, 405
BAGLIONI, A. (see BOWMAN, C. L.), 1
BAK, A. L. and JØRGENSEN, A. L., RNA polymerase III control regions in retrovirus LTR, Alu-type repetitive DNA, and papovavirus, 339
Bases, nucleic acid, theoretical study on the alkylation and protonation of, 509
BELINTSEV, B. N., The spatial form self-organization in the development of *Dictyostelium discoideum*, 123
BERETTA, E. and GAMBALE, F., A thermodynamic interpretation to formation of clusters at the cell surface, 85
Biological and chemical structure, new concepts of; consequences of consistently treating weak bonds as chemical structural determinants, 369
Biology, computer programs as theories in, 539
BLANK, M., Molecular association and the viscosity of hemoglobin solutions, 55
Bone, long, a stochastic-mechanical model of longitudinal growth, 413
BOWMAN, C. L. and BAGLIONI, A., Application of the Goldman–Hodgkin–Katz current equation to membrane current–voltage data, 1
BRIGGS, W. E., Cooperativity and extrema of the Hill slope for symmetric protein–ligand binding polynomials, 77

Capillary density, mathematical modeling of, 221
Cell surface, a thermodynamic interpretation to formation of clusters at, 85
Cells, non-growing and exponentially growing, a mathematical model that applies to protein degradation and post-translational processing of proteins and to analogous processes for other molecules in, 597
Cellular level, dimensional analysis of diffusion at, 437
Cerebral cortex, rhythmic processes in, 565
Chains, why are there two kinds in tetrameric hemoglobins?, 191
Chemical and biological structure, new concepts of; consequences of consistently treating weak bonds as chemical structural determinants, 369
Chemical contact pressure model for phyllotaxis, 481

Chemicomechanical transduction performed by enzymes activated by polymers, 173
CHEN, I. I. H. and DIANA, J. N., Mathematical modeling of capillary density, 221
Chromosomal genes, a hypothesis on the action of, 645
Classification of vegetation in integrated surveys, some neglected aspects of, 663
Clathrin lattice reorganization: theoretical considerations, 143
CLEAVE, J. P., LEVINE, M. R. and FLEMING, P. J., The control of ventilation: a theoretical analysis of the responses to transient disturbances, 261
Clusters at the cell surface, a thermodynamic interpretation to formation of, 85
Coding, epigenetic, theory of, 327
Codon degeneracy, a tetrahedral representation of poly-codon sequences and a possible origin of, 459
Coevolution of bacteria and phage: are there endless cycles of bacterial defenses and phage counterdefenses?, 319
Coevolution of directly contacting proteins in phage-bacterium ecosystem: possibility or fiction?, 405
COHEN, E. B., New concepts of chemical and biological structure: consequences of consistently treating weak bonds as chemical structural determinants, 369
Community invasion by complex life cycles, 377
Competition, resource, local, and the evolution of male-biased sex ratios, 203
Computer programs as theories in biology, 539
Conformation of viroids, is it involved in their pathogenicity?, 519
COOK, N. D., The transmission of information in natural systems, 349
Cooperativity and extrema of the Hill slope for symmetric protein–ligand binding polynomials, 77
Cornea model, human, calculation and application of the anterior surface area of, 295
CORNISH-BOWDEN, A., Enzyme specificity: its meaning in the general case, 451
"Criterion of subtraction" problem in allometry; the determination of relative size 131
Current–voltage data for membranes, application of the Goldman–Hodgkin–Katz current equation to, 1

Degeneracy, codon, a tetrahedral representation of poly-codon sequences and a possible origin of, 459
Degradation, protein, and post-translational processing of proteins, a mathematical model that applies to, and also to analogous processes for other molecules in non-growing and exponentially growing cells, 597
DEROME, J.-R. (see VICTORRI, B.), 227
Development of *Dictyostelium discoideum*, the spatial form self-organization in, 12
DIANA, J. N. (see CHEN, I. I. H.), 221
Dictyostelium discoideum, the spatial form self-organization in the development o 123
Diffusion at cellular level, dimensional analysis of; transport similarity, 437
DNA, the frequency of matching sequences in, 111
DNA, repetitive, Alu-type, retrovirus LTR, and papovirus, RNA polymerase I control regions in, 339

Ecosystem, phage-bacterium, coevolution of directly contacting proteins in; possibi ity or fiction?, 405

EDSON, J. L. (see HAEFNER, J. W.), 377
ELDER, D., Theory of epigenetic coding, 327
Enzymatic feedback systems, frequency conversion mechanism in, 529
Enzyme specificity: its meaning in the general case, 451
Enzymes activated by polymers, chemicomechanical transduction performed by, 173
Epigenetic coding, theory of, 327
ESHEL, I., Are intragametic conflicts common in nature? Do they represent an important factor in evolution? (letter), 159
ESHEL, I., On the evolution of an inner conflict, 65
Evolution of an inner conflict, 65
Evolution, do intragametic conflicts represent an important factor in?; are they common in nature? (letter), 159
Evolution of male-biased sex ratios, and local resource competition, 203
Evolution of mating systems, genetic and strategic models for, 285
Evolution (see also Coevolution), 319, 405
Evolutionarily stable strategies, 491
Evolutionarily stable strategy in hypercyclic organization, gain of information and (letter), 469
Evolutionary model of a neural network, 31
Extrema and cooperativity of the Hill slope for symmetric protein–ligand binding polynomials, 77

Feedback systems, enzymatic, frequency conversion mechanism in, 529
FERREIRA, R. and JACCHIERI, S. G., Why are there two kinds of chain in tetrameric hemoglobins?, 191
FLANAGAN, M. (see also LISANTI, M. P.), 143
FLEMING, P. J. (see CLEAVE, J. P.), 261
FLORES, R., Is the conformation of viroids involved in their pathogenicity?, 519
Frequency conversion mechanism in enzymatic feedback systems, 529

Gain of information and evolutionarily stable strategy in hypercyclic organization (letter), 469
GAMBALE, F. (see BERETTA, E.), 85
Genes, chromosomal, a hypothesis on the action of, 645
Genetic and strategic models for the evolution of mating systems, 285
GETZ, W. M., Population dynamics: a *per capita* resource approach, 623
Gingivitis, human, a new hypothesis of the role of ascorbic acid deficiency in, 163
GLEESON, S. K., Medawar's theory of senescence (letter), 475
Goldman–Hodgkin–Katz current equation, application to membrane current–voltage data, 1
GOLDSTEIN, B. E. (see MOSTELLER, R. D.), 597
GROSSMAN, L. I. (see MOORE, G. P.), 111
Growing cells, a mathematical model that applies to protein degradation and post-translational processing of proteins and to analogous processes for other molecules in, 597
Growth, hydroponic, of plants, optimization of; orthogonal projection experiments for many-parameter dependent phenomena (letter), 315
Growth, long bone, longitudinal, a stochastic-mechanical model of, 413

GÜNTHER, B. and MORGADO, E., Transport similarity: dimensional analysis of diffusion at cellular level, 437

HAEFNER, J. W. and EDSON, J. L., Community invasion by complex life cycles, 377
HAYASHI, K. (see OKAMOTO, M.), 529
Hemoglobin solutions, molecular association and the viscosity of, 55
Hemoglobins, tetrameric, why are there two kinds of chain in?, 191
Hill slope for symmetric protein–ligand binding polynomials, cooperativity and extrema of, 77
Hormone action, steroid, and the possible role of steroid receptor recycling in the modulation of, 39
Human cornea model, calculation and application of the anterior surface area of, 295
Human gingivitis, a new hypothesis of the role of ascorbic acid deficiency in, 163
Hydroponic plant growth, optimization of; orthogonal projection experiments for many-parameter dependent phenomena (letter), 315
Hypercyclic organization, gain of information and evolutionarily stable strategy in (letter), 469

Information gain and evolutionarily stable strategy in hypercyclic organization (letter), 469
Information transmission in natural systems, 349
Inner conflict, on the evolution of, 65
Intragametic conflicts, are they common in nature? Do they represent an important factor in evolution (letter), 159
ISHIDA, K., Gain of information and evolutionarily stable strategy in hypercyclic organization (letter), 469
